

ArchitekTour Copen hagen

06.05.-10.05.2020

Denmark / Copenhagen

ArchitekTour Copenhagen

Dear Architecture Lovers,

explore Copenhagen - a city that sets new standards for sustainable urban development. Design sensitivity, political foresight, economic innovation and green mobility are paving the way for Copenhagen to become a CO2-neutral capital in 2025.

Experience a new ArchitekTour, that helps you discover the latest urban planning solutions combined with stellar architecture. Take a look behind the scenes of some new projects and have a exchange with architects and other experts.

Visiting a selection of already realized projects and listening to some Scandinavian architects at the European Precast Concrete Congress (BIBM) will provide insight into some of the most innovative best practice design solutions for livable and sustainable urban development, that can also be transferred to other places.

A joint event by the (German) Information Centre for Concrete Ltd (InformationsZentrum Beton GmbH), BETONSUISSE and Zement+Beton Handels- und Werbegesellschaft mbH, this ArchitekTour is aimed at architects and all people interested in architecture.

We are looking forward to your registration and hope you will join us on this informative ArchitekTour! The tour is accompanied by our experienced and knowledgeable architectural guide as well as a professional tour guide.
