

Outletcenter, Parndorf (AT)

Application: Industrial floor
Customer: Outletcenter Parndorf
Objekt: Shoppingcenter
Size: about 6'000 m²
Country: Austria
Year: 2016
Fiber: Fibrofor Diamond

Description

Floating base plate on 10 cm insulation. Problem: Due to the tight schedule, the floor had to be installed before the hall was closed, what inevitably would have led to cracks. This could be avoided with Fibrofor Diamond..

The main benefit with the Fibrofor Diamond solution:

Avoidance of the early shrinkage-cracks
- Lower cost for reinforcement (no steel, no installation work)
- Static calculation free of charge (finite elements) based on the latest standards (Eurocode)
