

## Fatzer AG, Romanshorn (CH)

**Appliation:** Heavily loaded production area  
**Client:** Fatzer AG  
**Object:** Fatzer plant, Romanshorn  
**Size:** 3 700 m<sup>2</sup>, Field size about 30 x 22 m  
**Country:** Switzerland  
**Year:** 2013  
**Fiber:** Concrix ES

### Short description

In the new factory of Fatzer, a manufacturer of steel ropes for lifts and ropeways, the floor with cable drums will be charged up to 52 to total weight (26 to point load). A jointless floor that will withstand these strains was desired.

### Advantages of the Concrix solution:

- Massive reduction of the construction time of the floor
- Lower cost for the reinforcement due to the replacement of the steel
- Lower processing costs (no installation time for steel)
- No corrosion and low maintenance costs (jointless)
